

MOUSEPADS

SHIKORO XL

DESCRIPTION

SHIKORO provides an optimal ratio of speed and control. The mouse glides on a waterproof contact surface without much friction, but at the same time retains superior precision, even when performing very fine movements. The rubber base prevents the substrate from slipping, and the hemmed edges guarantee its durability.

KEY FEATURES

- The cellular rubber base makes sure your mouse is the only thing that moves on your table. The thickness of 3 mm throughout the whole mousepad's area creates solid stability for quick movements.
- Stitched edges in black color prevent the surface finish from ever peeling off.
- SHIKORO provides an optimal ratio of speed and control. The mouse glides on a waterproof contact surface without much friction, but at the same time retains superior precision, even when performing very fine movements. The rubber base prevents the substrate from slipping, and the hemmed edges guarantee its durability.
