

Ergonomic mice

R-Go HE

1. VERTICAL ANGLE OF 60°

The natural posture of hand and wrist stimulates mouse movements from your arm. This prevents RSI complaints.

2. ROUND SHAPE

Round shape for an ergonomic grip. This allows you to work comfortably and use less force when clicking.

3. THUMB SUPPORT

Full support for your thumb with a thumb support. This gives a relaxed posture.

4. LITTLE FINGER SUPPORT

Full support for your little finger by means of a little finger support. This prevents your little finger from sliding over the desktop while working.

5. FITS IN EVERY HAND

Our mice are available for left- and right-handed people, and in different sizes: a mouse for every hand!

We care for our environment

- Our mice have a circularity certificate
- We give a lifetime return guarantee and then ensure that our mice are recycled at the end of their life.
- We are a member of WEEE, a European directive that regulates the collection and recycling of electronic equipment.

R-Go HE Break

Ergonomic mouse with break indicator

Short movements during your working day are vital for your health! Micro breaks prevent overloading of small muscles and tendons and improve your concentration.

Because breaks are often forgotten when you're concentrated at work, we've developed a break tool that reminds you to interrupt your work on time.

The patented **R-Go Break software** uses colour signals to indicate when it's time to take a break. During mouse usage, the light changes colour, like a traffic light:

- Green: good job!
- Orange: time for a short break
- Red: you've been working too long

This way you will get positive feedback about your break behaviour.

Download the R-Go Break software:

"Should've bought a lot sooner. Had a lot of pain in my wrist because of much scrolling. The first time you use it, you immediately feel the difference. No more pain..."
