## USB Type-C® DockingStation with integrated NVMe slot

Looks like a smartphone, feels like a smartphone, is easy to carry around like a smartphone, but is a DockingStation with an enormous range of functions. Not only the usual features for a DockingStation like UHD video output, multi-LUN card reader and USB data ports for up to 10 Gbit/s data transfer rate are offered. For the first time, you also get the option to insert an M.2 NVMe SSD directly into the device and thus store and present all your data with just one device. A real novelty!

## PRODUCT FEATURES

### Appearance and performance

The multiple interfaces of this DockingStation enable solutions for a wide range of applications, because they not only allow high data transfer rates with extensive capacity reserves, but also the greatest possible flexibility in operation: for use as a pure external enclosure or as a dedicated DockingStation. With the Premium High-Speed HDMI® extension, support for various memory cards, USB versions and formats and, last but not least, Power Delivery passthrough, it acts like a well-stocked toolbox.

### NVMe SSD for on the go!

This DockingStation combines sophisticated looks and efficient technology in a very compact size. Made of high-quality aluminium, this mobile DockingStation not only looks elegant, it also serves as a mobile storage solution - with an integrated M.2 NVMe SSD slot! This solution suits any location, be it in the private or business sector.

### Fall down and carry on!

Specially designed for carrying the unit to different locations, this DockingStation comes with a rubber sleeve to mitigate damage in case of accidental falls or unintentional collisions during transport or use. It serves not only to protect the DockingStation, but also to enhance the appearance of the device in modern style.
